Generative AI for Data
Science with Copilot

Data Preparation and
Evaluation with Copilot

Data Analysis, Visualization,
and Communication with
Copilot

Jun 1, 2025

Bongani Mbambiso

has successfully completed the online, non-credit Specialization

Generative AI for Data Scientists

This specialization program equips learners with the skills to leverage generative AI, specifically Microsoft Copilot, in their data science workflows. Participants will use Copilot to analyze data, generate insights, streamline data preparation, create visualizations, and effectively communicate findings. They will also be able to explain the ethical implications and best practices surrounding the use of generative AI in data science. Upon completion, learners will be proficient in applying AI tools to enhance their data-driven decision-making processes and drive innovation within their organizations.
