ChatGPT + Excel: Master Data, Make Decisions, Tell Stories

ChatGPT + Excel: Master AI-driven Formulas & Visualizations

Prompt Engineering for ChatGPT

May 8, 2025

Bongani Mbambiso

has successfully completed the online, non-credit Specialization

ChatGPT + Excel: AI-Enhanced Data Analysis & Insight

This certificate recognizes mastery in leveraging AI-driven tools to revolutionize Excel workflows, enabling the graduate to automate complex tasks, craft advanced formulas, and design impactful data visualizations. The individual has demonstrated expertise in transforming raw data into actionable insights, solving real-world business challenges such as merging datasets, debugging errors, and creating dynamic dashboards. They are proficient in using AI to streamline processes, generate VBA scripts, and even turn visual concepts from photographs into fully functional Excel solutions. Graduates of this specialization possess the skills to enhance decision-making, drive efficiency, and tell compelling data stories, making them invaluable assets in any data-driven role.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Jules White

Jules White, Ph.D.,
Professor of Computer Science, Senior Advisor to the Chancellor on Generative AI in Enterprise & Education
