Generative AI Database Design & Management with ChatGPT

Chat with Your Data: Generative AI-Powered SQL Data Analysis

Prompt Engineering for ChatGPT

May 9, 2025

Bongani Mbambiso

has successfully completed the online, non-credit Specialization

Generative AI SQL Database Specialist with ChatGPT

This certifies that the holder has mastered the integration of generative AI with SQL database systems, demonstrating advanced proficiency in using AI to design robust database schemas, generate complex SQL queries through natural language, and create powerful data visualizations without programming. The recipient can implement cutting-edge techniques including database simulation, query optimization, and automated analysis—positioning them as an innovation leader capable of transforming how organizations interact with their data through the strategic application of AI and SQL technologies.
